

## DCW DC Wall Controller

The DC Wall Control unit completely replaces the remote control handset and receiver that is included with your DC ceiling fan. The DC Wall Control kit includes the Wall Control module and also a Wall Control receiver to be installed in the ceiling fan's canopy.

**0** Fan Off Setting

**1-5** Fan Speed: 5 (High) / 1 (Low)  
Turning knob left or right offers same function.

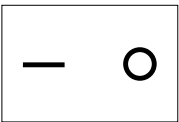

Summer/Winter Reverse button.  
Slide to change fan direction.

Light On/Off: Press this button to turn the light on or off.

Light Dimming: Press this button for step dimming brightness levels.

Isolation Switch: Used to isolate all power to fan.

DC Wall Control Unit

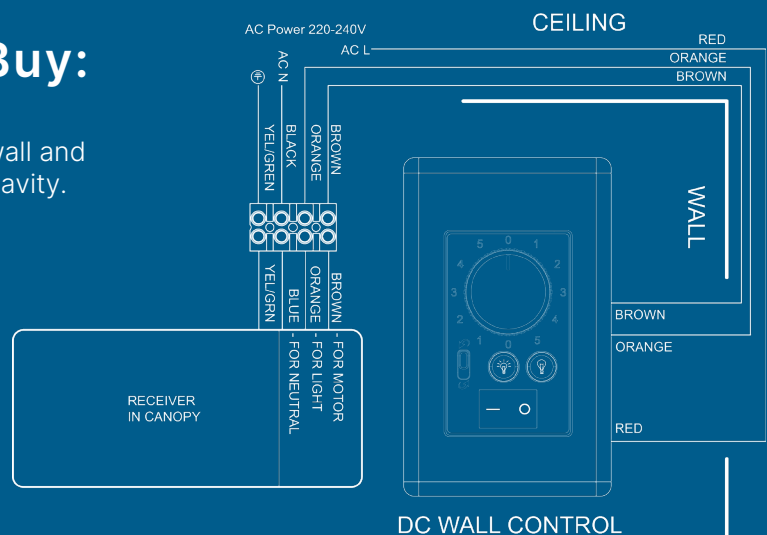

Remote Control

You can enjoy the convenience of a remote control handset and the reliability of a fixed wall control. Both devices work together - the most recent command from either device will control the fan.

## Must-Know's Before You Buy:

Speak with your installing electrician to confirm that Household Active (RED) wiring can be routed to the wall and up to two wires returned from the wall to the ceiling cavity.

1. Can you get 240V Household Active Supply to the wall controller location where you will be mounting the wall control?
2. For ceiling fan's that use a light, your electrician will need to return two wires from the wall control back to the ceiling cavity.

## Specifications

Each DC Wall Controller can only control a single ceiling fan. Multiple ceiling fans can not be wired to a single wall control unit. Each DC Wall Controller must be model matched to the correct ceiling fan. Refer to the table below to confirm the correct wall controller is being used.

### Electrical specifications of receiver

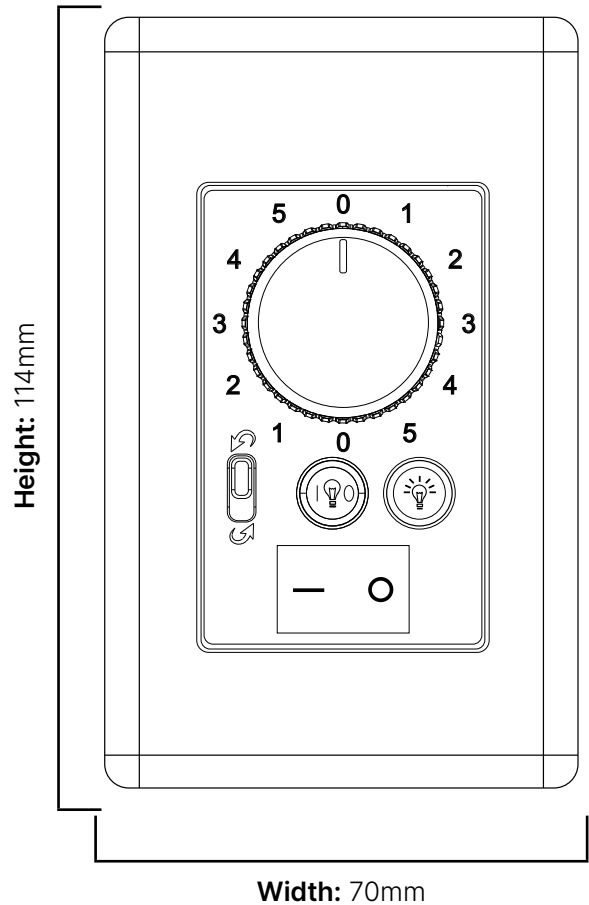

Fan DC Motor: 230-250V, ~50 Hz, 50W

LED Light: Max 60W

### What's included

- DC Wall Control Unit
- DC Wall Control Receiver
- Bracket for mounting to wall
- Companion remote control

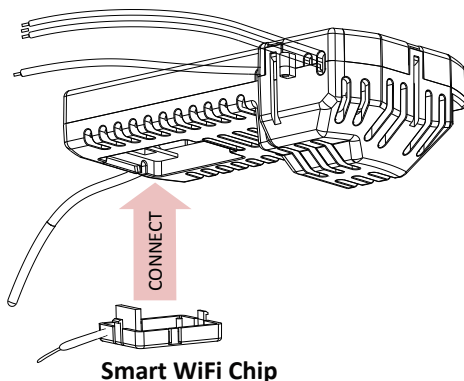

Standard DC Wall Control SKU	Suits models
DCW-AMB	Ambience (all sizes)
DCW-DEL	Delta DC (all sizes)
DCW-FLJ	FlatJET DC (all sizes)
DCW-SIM45	Simplicity DC (45" only)
DCW-SIM52	Simplicity DC (52" only)
DCW-SPD52	Spitfire DC (52" only)
DCW-SPD60	Spitfire DC (60" only)

## Transform your ceiling fan into a Smart Fan with the Smart WiFi Chip

Enjoy the ultimate convenience, with voice and smartphone app control using your favourite voice assistant. The optional WiFi module (chip) upgrades your ceiling fan, offering:

-  app control for each ceiling fan (iOS & Android)
- Smart voice assistant integration
- Control your ceiling fan using the DC Wall Control
- Control your ceiling fan using the companion handset
